AHMAD KHAN LODHI

Johar Town, Lahore | (+92)-302-4209944 | 01ahmadlodhi@gmail.com | Linkedin | Portfolio

OBJECTIVE

Computer Science graduate (Software Development major, Quality Assurance minor) with hands-on experience building Flutter mobile apps, testing software, and developing Python-based machine learning solutions. Seeking an internship to contribute to mobile app development, quality assurance, or artificial intelligence projects.

SKILLS

Mobile App Development: Flutter, Dart, React Native, UI/UX Prototyping, Figma, Local Data Storage, App Debugging

Software Testing & QA: Test Case Design, Bug Reporting, Defect Life Cycle, Functional Testing, Regression Testing, Requirement Analysis

AI / ML & Data: Python, Pandas, NumPy, scikit-learn, SQL, Power BI

Programming: Python, C, C++, Java, Dart, PHP (Laravel), SQL

Software Processes: SDLC, STLC, Agile Methodologies, Software Project Management

Tools: Figma, Power BI, Google Sheets, MS Office

Soft Skills: Team Coordination, Leadership, Communication, Problem Solving, Time Management, Attention to Detail

Languages: English (Fluent), Urdu (Native), Punjabi (Native)

WORK EXPERIENCE

Software Development Intern — Star Automation, Lahore *Jul 2026 – Sep 2026*

- Working on real-world web applications using PHP and Laravel.
- Assist in developing, debugging, and maintaining application features based on project requirements.
- Analyze existing code and workflows to identify and resolve functional issues, applying a quality-focused mindset to catch bugs early.
- Work with the software team to understand requirements and deliver reliable, well-tested solutions.

Manager Intern — Vital Petroleum, Lahore *Jul 2024 – Sep 2024*

- Coordinated daily operations, including inventory checks and monitoring stock availability for daily needs.
- Handled customer requirements and resolved day-to-day issues through effective communication and problem-solving.
- Developed practical experience in leadership, task coordination, and time management.

PROJECTS

AI-Based Task Scheduler | *Python, Pandas, NumPy, scikit-learn*

- Developed a task scheduling system to automate and prioritize daily workloads.
- Analyzed task requirements and implemented scheduling logic using Pandas, NumPy, and scikit-learn.
- Tested the scheduling logic against sample data sets to check for errors before finalizing results.

Medical Inventory & Stock Management System | *Flutter, Dart*

- Developed a Flutter-based inventory management app based on real-world clinic workflow requirements.
- Planned and implemented modules for medicine search, cart and billing, stock management, editable bills, and stock reporting.
- Implemented local data storage and database backup/sharing to support offline operation.

Pump Daily Report Generator | *Flutter, Dart*

- Developed a mobile application to automate daily fuel station reporting and reduce manual work.
- Implemented features for sales, stock, supply, and expense tracking with one-tap report generation.
- Manually tested each feature across different input scenarios to confirm accuracy before release.

Coffee Shop App UI Clone | *React Native*

- Recreated a coffee shop app's UI in React Native, focusing on layout accuracy, spacing, and visual consistency across screens.

EDUCATION

University of Central Punjab, Lahore *Mar 2022 – Feb 2026*

- Bachelor of Computer Science — Major: Software Development, Minor: Quality Assurance, CGPA: 3.25

LEADERSHIP ACTIVITIES

- Volunteered in several campaigns and raised a creditable amount for charity.
- Mentored school-level students in foundational learning and problem-solving skills through structured explanations and personalized academic support.
